

TABLE OF CONTENTS

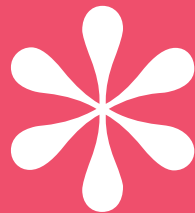

Table of contents

Preface	11
1 From Primary School to ETH (1932 – 1951)	17
1.1 Undergraduate studies	20
1.2 Military service	26
1.3 Student life	28
1.4 Diploma thesis and diploma	30
1.5 Zingiberene structure	34
1.6 Farnesene Rule	37
1.7 Jakob Schreiber, my first student	42
1.8 Hans Schinz, my doctoral thesis supervisor	44
Footnotes	46
2 From Postdoc to Privatdozent at ETH (1951 – 1960)	49
2.1 Founding the Eschenmoser group	51
2.2 Steroid syntheses	54
2.3 Base-induced fragmentation of C,C bonds	58
2.4 Biogenetic Isoprene Rule	59
2.5 Stereochemistry of acid-catalyzed polyene cyclizations	64
2.6 Stereochemical interpretation of the Biogenetic Isoprene Rule in triterpenes	66
2.7 First trip to the USA (1954)	70
2.8 Edgar Heilbronner and the benzotropylium cation ..	75
2.9 Determination of the relative configuration of secondary alicyclic alcohols	77
2.10 Total synthesis of colchicine	79
Desacetylamino-colchicine	87
2.11 Laboratory of Organic Chemistry: from Ruzicka to Prelog	89
Harlan Goering	91
Footnotes	93
3 Professor at ETH – Reaction Mechanisms and Syntheses (1960 – 1992)	97
3.1 Courses and lectures at home and abroad	99
3.2 Visiting professor at MIT (1961)	101
3.3 Visiting professor at University of Wisconsin (1965) .	103
3.4 Turbulent times at ETH	105

3.5 The corrin saga and the synthesis of vitamin B₁₂ (1960 – 1972)	112
IUPAC International Symposium on the Chemistry of Natural Products (1960) ..	115
Model-corrin synthesis (1964)	117
Vitamin B ₁₂ synthesis – ring-B precursor	127
The dream of a vitamin B ₁₂ synthesis from a single starting material	129
Vitamin B ₁₂ synthesis – ring-C precursor	129
Synthesis of the B-C component: sulfide contraction C,C-condensation method .	130
Transatlantic cooperation – phase I	133
Model-corrin synthesis 1968 – photochemical A/D-secocorrin → corrin cycloisomerization	139
The common corrinoid intermediate via photochemical A/D-secocorrin → corrin cycloisomerization	146
Transatlantic cooperation – phase II	152
Black Friday	154
Jointly executed final steps to cobyrinic acid	155
3.6 Post-B₁₂ psychological and publication issues (1973 – 1992)	164
Promises – not kept	168
3.7 Research topics also running I (1960 – 1972)	169
α,β-Epoxyketone to alkynone fragmentation	169
Non-existence of endocyclic S _N 2-type reactions	170
Chemistry of vinyl nitrosonium salts	173
Slow nitrogen inversion in tertiary amines	173
<i>N,N</i> -Dimethyl- <i>N</i> -methylidene immonium iodide	175
Footnotes	177

4 Professor at ETH – Etiologies and Prebiotics (1973 – 2008) .	183
4.1 Chemical etiology of the vitamin B₁₂ structure (1973 – 1988)	185
Do dark variants of the A/D-secocorrin → corrin cycloisomerization exist?	185
The 20-methyl-20-hydroxy-dihydrocorphinolate → 19-acetyl-corrinate ring contraction	186
Is the apparently complex molecular structure of vitamin B ₁₂ in fact a simple one?	189
Arrangement of the peripheral acetic and propionic acid side chains on the corrin ring	190
Why is vitamin B ₁₂ a corrin and not a corphin?	191
Why is the nucleotide chain of vitamin B ₁₂ linked to the propionic acid side chain of ring D?	193
How and why is the periphery of the four five-membered rings of vitamin B ₁₂ quaternized by C-methyl groups?	195
Some social-scientific collaterals from the times of the B ₁₂ etiology	196
4.2 Research topics also running II (1973 – 1988)	197
A new corphinoid coenzyme: Factor F430	197
The question of the structure of the photosynthetic reaction center P700	199
Fragmentative access to macrolides	201
Stereochemistry of allylic reactions	202
4.3 Prebiotics (1976 – 2008)	203
4.4 Etiology of the structural type of natural nucleic acids (1987 – 2008)	211
Oligo-dipeptamidines	212
Why pentose and not hexose nucleic acids?	213
Homo-DNA	216
Gluco-, allo-, and altopyranose oligonucleotides	218

Pyranosyl-RNA: D- β -ribo-pyranosyl-(2' \rightarrow 4')-oligonucleotides	220
Self-assembly of p-RNA duplexes	222
On the origin of biological homochirality	223
Xylo-, lyxo-, and arabinopyranose isomers of p-RNA	225
TNA: L- α -threo-furanosyl-(2' \rightarrow 3')-oligonucleotides	226
<i>Footnotes</i>	232
5 Emeritus	233
5.1 University of Frankfurt (1993 – 1996)	241
5.2 The Scripps Research Institute (1996 – 2009)	243
Prehistory of an extraordinary privilege	243
Everyday life in La Jolla	246
Research at TSRI	248
<i>Footnotes</i>	254
6 Other Activities and Honors	255
6.1 Consulting	257
Fluka	257
Ciba	258
Firmenich	259
6.2 Lecture tours and symposia	260
6.3 Visiting professorships	269
6.4 Membership in academies	271
6.5 Awards	272
<i>Footnotes</i>	276
Concluding Remarks	277
How this autobiography came about: the backstory	279
Post – La Jolla activities	284
Acknowledgements	286
Appendix	287
Biographical notes	289
Vita	313
Chemistree	314
Holographs	316
References	319
Table of contents	334
Links and literature	339
Image sources	341
Index	342
