

TABLE OF CONTENTS

Table of contents

Prologue	11
1 Early Days: From Bombay to the U.S.	23
1.1 Childhood and family: almost a midnight child	25
1.2 Adolescence in Bombay: what a city!	31
1.3 The United States of America (1972–1978)	34
2 From the U.S. to Hyderabad via Bangalore	43
2.1 Interregnum in Bangalore (1978–1979)	45
2.2 The University of Hyderabad: jungle man	47
2.3 Intermolecular interactions: how molecules talk to each other	49
3 Crystal Engineering: The Design of Organic Solids	61
3.1 Origins of the 1989 book: redefinition of crystal engineering	64
3.2 Beginnings of a new idea: epiphany and the four voices	68
3.3 Intelligence augmentation with the CSD: codebreaking	70
3.4 <i>Chemical Communications</i> or <i>ChemComm</i>	72
3.5 Hydration in organic crystals	74
4 Supramolecular Synthons and a New Organic Synthesis	77
4.1 Molecular synthesis: making and breaking covalent bonds	79
4.2 Retrosynthesis: inductive logic	81
4.3 Supramolecular synthesis: making and breaking intermolecular interactions	82
4.4 The supramolecular synthon: the core of a crystal structure	84
4.5 Introduction to the International Union of Crystallography	92

5 The Weak Hydrogen Bond: What Is “Weak”?	97
5.1 My Austrian collaborator	100
5.2 Strong and weak hydrogen bonds	101
5.3 Resistance to our ideas—from a big gun	105
5.4 Writing the book	109
5.5 Two new crystal engineering journals	110
5.6 Germany and the Alexander von Humboldt Stiftung	111
5.7 Fluorobenzenes: tilting at windmills	114
6 Interactions, Synthons, and Structural Design: Strategies of War	121
6.1 A holistic view: emergence vs reductionism	123
6.2 Carboxylic acids: backbone of synthon theory	125
6.3 Phenols and aminophenols: conformational freedom	127
6.4 Multicomponent crystals and crystallisation: an oxymoron?	129
7 Going Native into the Indian Scientific System	133
7.1 Department of Science and Technology: the idea of “Delhi”	135
7.2 Deanship of the school of chemistry in the University of Hyderabad	137
7.3 Council of Scientific and Industrial Research	138
7.4 The Asian connection	139
7.5 Polymorphism: no more a nemesis	141
7.5.1 Crystal Structure Prediction (CSP): it's not guesswork	143
7.5.2 CSP and AI: brute force solutions—AI and scientific publishing	152
7.5.3 Back to polymorphism: same molecule, different crystal structures	156
7.6 The Gordon Research Conference (GRC) 2010: a battle royal	161

8	Return to the Indian Institute of Science	165
8.1	Back in Bangalore: return of the native	168
8.2	From an idea to a textbook in 30 years	172
8.3	Bending and twisting molecular crystals to order	175
8.4	Synthesis of higher cocrystals: how many components can you introduce?	179
9	The International Union of Crystallography	185
9.1	What is a crystal?	187
9.2	Member Executive Committee of the IUCr (2005–2011)	189
9.3	IUCr president	193
9.4	International year of crystallography (2014)	194
9.4.1	Reflections on the importance of IYCr 2014	198
9.4.2	Crystallography and geostrategies	199
9.5	Bringing the IUCr home: the 2017 Hyderabad congress	201
10	A Continuing Thought Stream	
	Beyond Crystal Engineering	207
10.1	Thoughts on chemistry	213
10.2	On doing chemistry and being a teacher—researcher in India	214
10.3	Reductionism and holism in chemistry	217
10.4	End of the reductionist dogma in chemistry?	219
10.5	Science and politics: why they are connected	226
10.6	On being a scientist	228
10.7	Indian Knowledge Systems	232
11	Epilogue	239
	Appendix	243
	Vita	245
	Chemistree	246
	Touchstones	248
	Holographs	250
	Publications	264
	Table of contents	282
	Links	287
	Image sources	291
	Index	292
